Program Description

This 12-month certificate program is designed to provide advanced clinical and didactic training in disciplines of general dentistry beyond the training received in dental school. The program is located in a facility on the St. Petersburg College Seminole Campus in Seminole, Florida that houses multiple operatories and is designed to model the private practice setting. This facility is a satellite clinic for the College of Dentistry.

All the clinical disciplines in dentistry are covered. Patient treatment is frequently complex and challenging, with multiple opportunities for experience in dental implants, periodontal surgery, advanced prosthetics, oral surgery, and orthodontics.

The faculty, which includes specialists from all of the dental disciplines as well as general dentists, provides continuous coverage in the clinic. Seminars, literature reviews, case presentations, and treatment planning seminars are part of the educational program. Practice management is an integral part of the program.

A stipend is available in the amount of \$32,000. No tuition is required.
